Terms of Reference (TOR) for 2013 Data Collections Science Program Reviews

Objective

The objective for these reviews is to review and evaluate the Center's current scientific fishery-dependent and fishery-independent data as it relates to fishery stock assessments conducted pursuant to the Magnuson-Stevens Act:

- NOAA ship-based surveys
- Cooperative research surveys
- Logbook and observer data
- Data management and quality control

Reviewers will provide advice to the Center on the direction and quality of these data collection and management programs

Using as context, two-three or more typical and important stock assessments conducted by the Center, reviewers should address:

- 1. To what extent do fishery independent survey data quality, statistical precision, and timeliness issues impact overall assessment accuracy, precision and timeliness?
- 2. What are the major fishery independent survey successes and how should they be supported?
- 3. What are the major fishery independent survey limitations/weaknesses and how could they be resolved? Define potential improvements and priorities for recommended improvements.
- 4. To what extent do fishery dependent data quality, statistical precision, and timeliness issues impact overall assessment accuracy, precision and timeliness?
- 5. What are the major fishery dependent data sources successes and how should they be supported?
- 6. What are the major fishery dependent data limitations/weaknesses and how could they be resolved? Define potential improvements and priorities for recommended improvements.
- 7. What recommendations do you have for prioritizing fishery-independent and fishery-dependent data collection improvements?
- 8. To what extent are fishery independent and fishery dependent data readily accessible to Center stock assessment scientists and to various external researchers who may wish to replicate NMFS stock assessments?
- 9. Identify the highest priority needs for improving fishery dependent and fishery independent data. Define potential improvements.

Overarching Questions for Reviewers

- ➤ Relationship of current and planned fishery assessment data activities to Center fishery assessments mandates and requirements is the Center doing the right things?
- ➤ Opportunities are there opportunities that the Center should be pursuing in collecting and compiling fishery assessment data, including shared approaches with partners?
- ➤ Scientific/technical approach are the Center's fishery data objectives adequate, and is the Center using the best suite of techniques and approaches to meet those objectives?
- ➤ Organization and priorities is the Center's fishery data system properly organized to meet its mandates and is the allocation of resources among program appropriate?
- ➤ Scientific conduct are the Center's fishery data programs being conducted properly (survey design, standardization, integrity, peer review, transparency, confidentiality, PII, etc.)?
